

# Wendy Trattner

## Education

2017-2021

### Massachusetts Institute of Technology

Candidate for Bachelor of Science in Mechanical Engineering

Relevant Coursework

- Mechanics and Materials
- Design & Manufacturing I & II
- Dynamics and Controls I & II
- Thermal-Fluids Engineering
- Computation in Python, Matlab
- Full Stack Web Development with React JS
- The Art & Science of Negotiation
- Entrepreneurship in Engineering

## Work Experience

Summer 2020

### Embark Trucks - San Francisco, CA

Hardware and Special Projects Intern

Designed, built out autonomous truck interior and led mechanical analysis strategy | Internal organization technical project management | Proposed partnerships and go-to-market strategy to COO and Head of Partnerships | Worked with Chief of Staff to define growth model.

Summer 2020

### MIT Environmental Solutions Initiative - Cambridge, MA, Remote

Climate Writer

Writing for the new MIT Climate Portal, a site for the general public to learn about many facets of climate change, explained in nontechnical language by experts.

2019-2020

### MIT Computer Science and Artificial Intelligence Laboratory, Distributed Robotics Lab - Cambridge, MA

Soft Robotics Undergraduate Researcher

Designed, fabricated, and tested sensorized handed shearing auxetics for soft robotic gripping | Projects focusing on development of soft, adaptive robotic grippers for applications in recycling/trash management and more.

Summer 2019

### Lyft Level 5 - Palo Alto, CA

Mechanical Analysis and Reliability Intern

Designed, analyzed, and tested retrofit camera mounts, determined feasibility of mounting locations | Determined acoustic targets and noise abatement methods for new generation of autonomous vehicles.

2018-2019

### Solar Electric Vehicle Team - Cambridge, MA

Mechanical/Aero/Composites Engineer

Designed and optimized driver roll cage for safety and efficiency using SolidWorks | Trained and supported new members | Manufactured crush zone and outer body, performed various composite layups | Secured sponsorship, assisted with public outreach and media.

Summer 2018

### Solar Powered Drone Research - Cambridge, MA; Wayqecha, Peru

Photovoltaic Engineer

Designed and built custom solar panels to power an automated quadcopter for rainforest conservation data collection | Tested product in Amazon Rainforest in collaboration with Conservation International | Created written reports to secure further funding and patents.

## Extra Curriculars

Fall 2019 -

Present

### Food Steward & Sustainability Chair at MIT Women's Independent Living Group

Reduced food waste by about 50% while saving \$5000+ | Created a sustainability chair position | Implemented a composting program for both WILG and the nearby fraternity ADP, for a total of 80 people.

2018-Present

### LeanOnMe Peer Supporter & Exec Member

Lean On Me is an anonymous peer support texting hotline focused on improving mental health on college campuses and combating suicide statistics. It automatically and anonymously connects students in need of support with trained peer supporters who attend their school.

2017-2018

### MIT Climate Action Team Event Coordinator

As part of MITCAT, I arranged for several speakers to come to MIT, including economic comedian Yoram Bauman and lead researcher for Project Drawdown Chad Frischmann.

2015-Present

### Recreational Poetry, Painting, Rock Climbing, Website Development
